

Dear Livestock and Seed Programs:

Please do NOT permit irradiated food to be served in the National School Lunch Program. Irradiated food has not been proven safe to eat. It degrades the nutritional content of food, and research has revealed a wide range of health problems in laboratory animals that ate irradiated food. In addition, it merely masks filthy and inhumane meat processing. Parents deserve the right-to-know what their children are eating, but irradiated food served in school cafeterias is not required to be labeled. I strongly urge you to keep irradiated food out of school lunches.

*Please let us have a say. Don't bow down to the financial interests that kill us over time for their profit. I am an agent among Viet Nam Vet with prostate cancer and diabetes. I wish somebody was looking out for me when they allowed these toxins into my body when I was 20.*

Sincerely, *Lawrence L. Richards*

Parents deserve the right-to-know what their children are eating, but irradiated food served in school cafeterias is not required to be labeled. I strongly urge you to keep irradiated food out of school lunches.

*Furthermore I urge you to feed children higher grade meat as what they are getting now is nearly unrecognizable!*

Sincerely,
